

# **2023 the 1th International Conference on Multidisciplinary Interdisciplinary Integration of Artificial Intelligence(MIIAI) Call for Research Papers**

## **Important Dates**

- Abstract submission: June 04, 2023
- Full paper submission: June 11, 2023
- Acceptance Notification: August 09, 2023
- Conference Date: December 12, 2023

\*All deadlines are 23:59 Anywhere on Earth (AoE) time

## **Conference Scope**

The International Conference on Multidisciplinary Interdisciplinary Integration of Artificial Intelligence(MIIAI) is a leading international forum for discussing the latest research on deep learning, reinforcement learning and intelligent transportation. MIIAI, a well-established international conference series that provides a forum for technical presentations and discussions among software researchers, developers, and users from academia, business, and industry, showcases state-of-the-art R&D activities in the general areas of deep learning, reinforcement learning, intelligent transportation and their applications.

## **Topic**

MIIAI-2023 welcomes high-quality, original, and previously unpublished submissions in database and machine learning theory. Topics of interests for the conference include, but not limited to, the following three topics:

<b>Deep Learning:</b>	<b>Reinforcement learning:</b>	<b>Intelligent transportation:</b>
<ul style="list-style-type: none"><li>● Computer Vision</li><li>● Natural Language Processing</li><li>● Speech Recognition</li><li>● Algorithm Optimization</li><li>● Cross-disciplinary Applications</li><li>● Recommended system</li></ul>	<ul style="list-style-type: none"><li>● Intelligent Robotics</li><li>● Game Strategy</li><li>● Algorithm Robustness</li><li>● Cross-disciplinary Integration</li><li>● Industrial Automation</li></ul>	<ul style="list-style-type: none"><li>● Urban Accessibility Analysis</li><li>● Vehicle Perception</li><li>● Traffic Flow Optimization</li><li>● Smart City Integration</li><li>● Environmental Impact</li></ul>

## Paper Submission

Paper submission must be in English. All papers will be double-blind reviewed by the Program Committee based on technical quality, relevance to MIIAI, originality, significance, and clarity. All paper submissions will be handled electronically. Any submitted paper violating the length, file type, or formatting requirements will be rejected without review. Each submitted paper should include an abstract up to 200 words and be no longer than 16 pages (including references, appendices, etc.) in LNCS (Lecture Notes in Computer Science) format. We encourage authors to cite related work comprehensively. When citing conference papers, please also consider citing their extended journal versions if applicable. All papers must be submitted electronically through the paper submission system in PDF only.

The submitted papers must not be previously published in a refereed journal or conference and must not be under consideration by any other conference or journal during the MIIAI review process. If the paper is accepted, at least one author must complete the regular registration and attend the online conference to present the paper. For no-show authors, their papers will not be included in the proceedings. Accepted papers will be published in the conference proceedings.

## Double-Blind Review

MIIAI-2023 will employ a double-blind reviewing process, i.e., the PC members and referees who review the paper will not know the identity of the authors. To ensure the anonymity of authorship, authors must prepare their manuscript as follows:

- Author's names and affiliations must not appear on the title page or elsewhere in the paper
- Funding sources must not be acknowledged on the title page or elsewhere in the paper
- Research group members, or other colleagues or collaborators, must not be acknowledged anywhere in the paper
- Source file naming must also be done with care, to avoid identifying the author's names in the paper's associated metadata. For example, if your name is Jane Smith and you submit a PDF file generated from a .dvi file called Jane-Smith.dvi, your authorship could be inferred by looking into the PDF file. Submissions must have all details identifying the author(s) removed from the original manuscript (including the supplementary files, if any), and the author(s) should refer to their prior work in the third person and include all relevant citations

Submissions having unrefereed pre-prints such as Arxiv are allowed, provided they are not issued within one month of the submission. Authors should make every effort to anonymize their work and, hence, cannot cite their own Arxiv work.

Reviewers will be requested to not try and break the anonymity. Papers that do not follow the guidelines mentioned above, or otherwise potentially reveal the identity of the authors, are subject to immediate rejection. Because of the double-blind review policy, the submission of an extended version of a short paper that has published

elsewhere is strongly discouraged in MIIAI-2023.

## **Formatting Template**

Please use one of the following templates for the LNCS (Lecture Notes in Computer Science) format: <https://www.springer.com/gp/computer-science/lncs/conference-proceedings-guidelines>

## **Submission Website**

<https://MIIAI.org.cn/conference/2023/submission>

## **Contact Information**

If you have any questions, please feel free to contact us.

Email: 1333MIIAI@neu.edu.cn or ny@neu.edu.cn.

Telephone: +86 13313331333

More information will be provided on the conference website.
